Exhibiting at AMIA has been a valuable tradition for Regenstrief and the Center for Biomedical Informatics. We have been exhibitors for more than twenty years and supporters of AMIA since its inception.

Originally the booth began as a way to recruit fellows into our program but it is much more now. Not only do we still work to recruit clinical informatics and NLM public health informatics fellows, but we also use the event to promote collaboration, innovation, and faculty recruitment with other outstanding attendees and organizations.

Participation at AMIA has been a great benefit, and this organization helps our mission as a leader in the Informatics field to improve health and health care.
