What will the attendee be able to do after being in your session?
This section may be a repeat of your outcomes-based learning objective. Sharing “Best Practices” is a pillar of the AMIA 2018 Clinical Informatics Conference; this format is an ideal way for presenters to share tools and strategies that helped them deal with a specific problem.

Description of the Problem or Gap
This template should be used as a starting point for AMIA submissions. A number of Word styles, all beginning with the word “AMIA”, are available for use in your submissions.

It is important to review the AMIA Call for Participation (CFP) where types of submissions considered and general requirements for each submission type are listed. All submissions must conform to the format and presentation requirements described in the CFP and at the submission site.

**Conclusion**

Your conclusion goes at the end, followed first by Attendee’s Take-away Tool, then followed by References, which must follow the Vancouver Style (see: www.icmje.org/index.html). References begin below with a header that is centered. Only the first word of an article title is capitalized in the References.

**Attendee’s Take-away Tool**

This text describes the take-away tool. The presenter may use an illustration to depict the tool on the 2nd page of the submission abstract.
